

# Typewriter in Residence

The Typewriter in Residence is a hacked Imperial Model 80 - made in the Leicester Factory. Visitors can use the Typewriter In Residence to find out more about the experiences of strikers and others working at Imperial Typewriters during the 70's, by pressing keys and answering prompt, they can read exerts from transcribed stories of those that took part in the strikes.

- Co-design and discovery workshops with school children
- Iterative design and validation of 'energy monitor' prototypes
- Design and project management of energy diary app
- Final deployment study of functional prototypes
- Co-ordination between stakeholders

**Project Client:** B3 Media

**Project Partners:** Divya Ghelani | Vinay Taylor | Mixed Reality Lab, University of Nottingham | Newark Houses Museum, Leicester .

# Hybrid Gifts

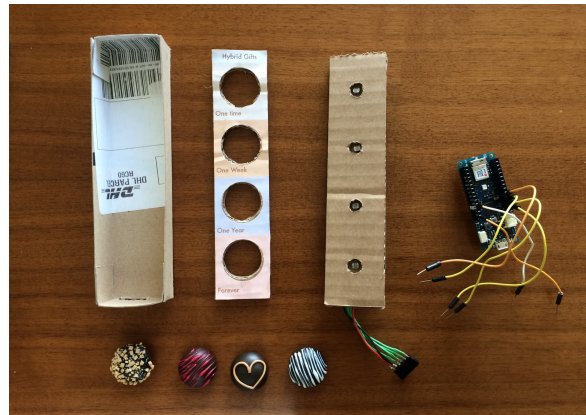

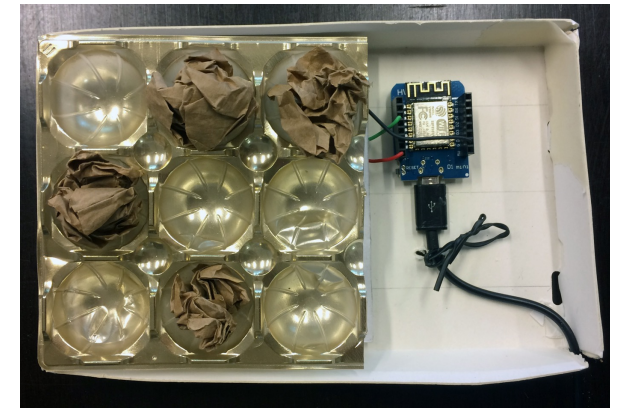

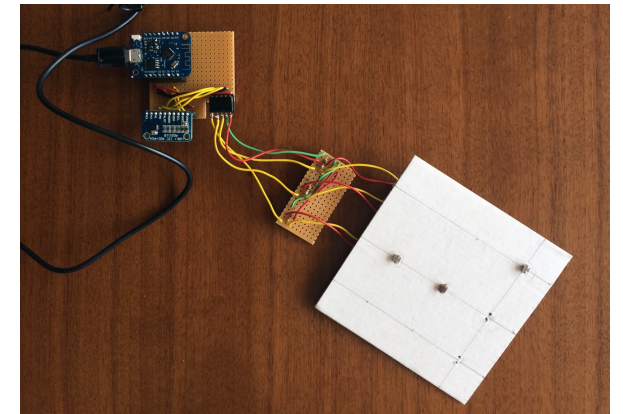

Collaborative research exploring how digital gifts might be physically 'unwrapped' to support a more personal digital gifting experience.

An Chocolate box containing sensors, triggers the display of digital content when chocolates are eaten.

- Iterative lo-fi prototyping
- Online interface design and specification
- 'Wizard of OZ' study to test concept and interaction.
- Functional prototype production.
- Planning and execution of final prototype validation study.

## Project Partners

Loughborough University Schools of Design and Creative Arts | Nottingham University, Mixed Reality Lab | Studio Chocolate
